**EVERYONE IS A MASTERPIECE.**

Caring Innovation

# SKIN OF THE BODY:

## HOW TO MAINTAIN A YOUNG APPEARANCE.

The **body** - like the face - deserves to have all its **BEAUTY DETAILS** enhanced through **constant care and attention**, to keep it looking **young** and **beautiful**.

Over the **course of a lifetime**, however, the body can also undergo **major changes** that can alter its appearance, favoring the appearance of imperfections, such as

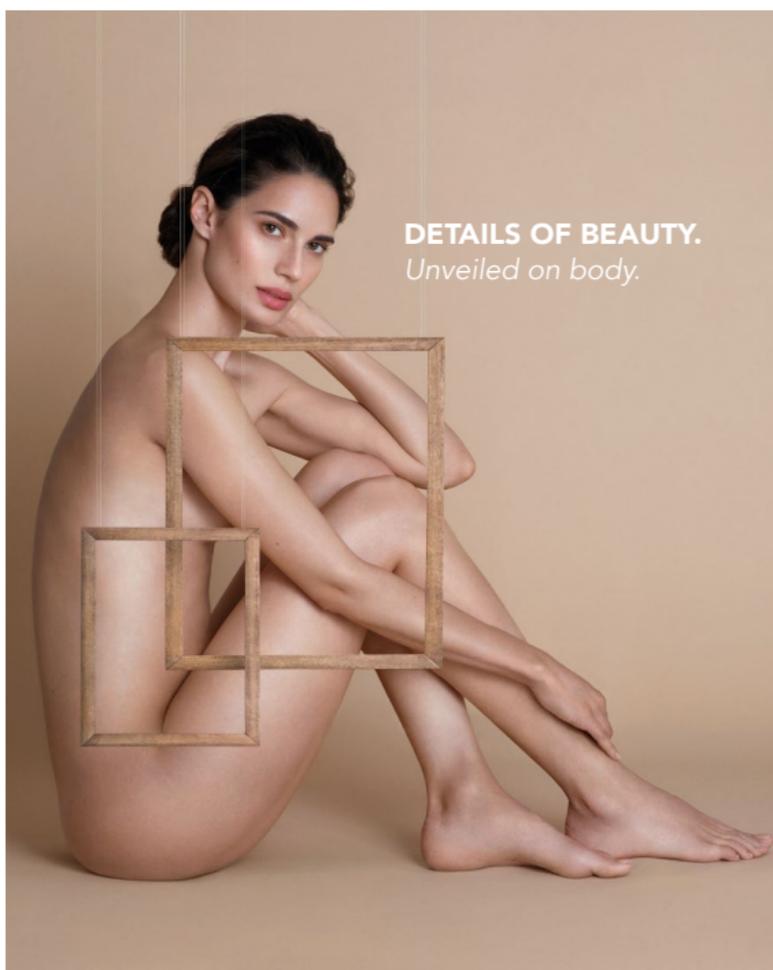

## SKIN LAXITY:

skin with loss of **tone, elasticity, firmness and turgidity**.

Unfortunately, it **often happens** that women decide **to hide** the areas most affected by these imperfections, such as the inner arms and abdomen, **instead of intervening with specific treatments** (aesthetic medicine treatments and professional cosmetics).

**IBSA** proposes **aesthetic treatments** based on **hyaluronic acid** to **enhance the beauty of these areas** while respecting their unique characteristics, because

## B O D Y

## K I T

A COMPLETE  
PROTOCOL  
FOR THE BODY  
TO TREAT  
SKIN LAXITY.

PROFILO® BODY KIT combines the **ACTION OF HYALURONIC ACID IN AN INJECTABLE TREATMENT**, performed in the clinic, and **COSMETIC TREATMENTS** with **CLINICALLY PROVEN EFFICACY**, to be applied after the aesthetic session, and then at home **TO MAINTAIN RESULTS**.

# PROFHILO<sup>®</sup>

## B O D Y

PROFHILO<sup>®</sup> BODY is a hybrid complex of **two different molecular weights of Hyaluronic Acid in high concentration.**

PROFHILO<sup>®</sup> BODY intervenes in the physiological process of skin aging. It has been designed for **TISSUE REMODELING** and **IMPROVEMENT IN SKIN LAXITY**<sup>1</sup> of:

**INNER ARM**

**ABDOMEN**

# RECOMMENDED TECHNIQUE

The **BAP Technique (Bio Aesthetic Points)** is the highly **recommended protocol for treating inner arm and abdomen.**

---

## ADVANTAGES:

- Only 10 points of injection for each area;
  - Non-invasive, as it reduces the possibility of bruises and swelling, while maximizing the diffusion of the product in the tissues;
  - It does not require any prior preparation of the patient.
- 

An initial cycle of **TWO TREATMENT SESSIONS WITH A 30-DAY INTERVAL** is recommended, followed if necessary by maintenance treatments.

All these characteristics make it the **PERFECT LUNCH-TIME PROCEDURE**, allowing the patient to go straight back to normal daily life.

# BEFORE AND AFTER

## INNER ARM

BEFORE

AFTER 2<sup>ND</sup> TREATMENT

The BAP injection technique focuses the action of PROFHILO® BODY where the skin appears loose and with a loss of turgor and skin tone, **bringing to treated area natural** and **long lasting dermal renewal**.

## ABDOMEN

BEFORE

AFTER 2<sup>ND</sup> TREATMENT
